Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The instant application is directed towards an unobvious improvement in the centrifugal fan art. Specifically, the impeller blades of the instant application requires the blades each being fixed to the outer peripheral end of a plurality of posts extending from the hub of the fan. The height of the blades and the portion at that is fixed to the posts is greater than the height of the posts and the thickness of the blades is less than the width of the posts.

While the prior art such as Toshiba home Tech (JP-D1118546) and Horng et al. (6,568,907) show centrifugal fan blades with root portions fixed to the hub being smaller in height as compared to the rest of the blade, neither teach or disclose the root portions having a greater thickness than the blade portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
